To Whom It May Concern;

*Gary Allen . principal  
Eldon Petersen . asst. principal  
Chad Kirby . asst. principal*

It is my pleasure to write this letter of reference for Darrell Andersen Construction. I have had the opportunity to work closely with their construction company for the past two years and have enjoyed my experiences with them as they been the construction company overseeing the remodel/construction project at Bear River High School.

I have been impressed with DWA and their support for our project. They pay close attention to the needs of our school. They recognize that we are holding school and have unique scheduling issues. We held weekly and often daily meetings to address our specific needs. There were many instances where DWA went to bat for Bear River High School by working with subcontractors when issues would impact our students and staff. We were truly the owner of the building and they made sure we were not short-changed.

Their management team is very accessible. They are a hands-on company and had a representative on the jobsite daily to make sure our concerns were addressed. I could approach the site superintendent or other DWA employees about specific questions concerning our building and they were always answered.

DWA takes great pride in their work. Their work site is clean and organized. I commented to them about how clean the work site is and their response was, "that is the way we operate." As I visit with other administrators in the area who have similar building projects going at their schools, I believe we are very fortunate to have DWA as our contractor. I have not encountered the problems that other schools seemed to have dealt with.

The final verdict with DWA will be the end product. I believe that is where they will rise above the rest. They take pride in their work and have made sure that our first phase is completed correctly and functioning for our teachers. There have been many walk-throughs in the building to identify unfinished items and continual follow up with issues that are not quite right in the building. DWA does not push unfinished items to the back of the list. They make sure that the building concerns are addressed and completed to our satisfaction.

I have nothing but praise for DWA and our construction at Bear River High School.

Sincerely,

A handwritten signature in black ink that reads "Gary D. Allen". The signature is written in a cursive style with a large, sweeping "G" and "A".

Gary D. Allen  
Principal
