**Subject:** HPER Bike rack Addendum #1

### Addendum # 1 - Bike Rack

The actual model number for the bike rack is;

Madrax

Orion Square Rack

ORNS-2-SF-ES

Stainless steel/ square tube/ surface mount/ single hoop style.

Please confirm receipt of this addendum both via email as well as on your bid forms.

Thanks, Joe

**Addendum #2**

August 29, 2023

HPER Covered Bike Rack Project

To: All Bidders

This information will be considered as part of the Construction Documents, Receipt of this information will need to be confirmed both via email, as well as on your Bid Forms. Failure to acknowledge this Addendum, will result in Bid Disqualification.

**Item #1 – Concrete Control Joints**

The Project specifications refers to control joints in new concrete to be “tooled radius” joints. The adjacent concrete control joints are currently sawcut. For this project we will be using sawcut control joints to make adjacent.

For the cold joints the final look is to look similar to a sawcut joint. The contractor will use whatever means available to represent this look at the Cold Joint locations as well as the regular control joints referenced above.

If there are any questions regarding this information, please contact me at your convenience.

Thanks, Joe Beck
