Construction Schedule	June 1, 2024, thru August 17, 2024
Completion Date	On or before August 17, 2024

Project Scope General Information:

Each contractor will be responsible to visit the site and obtaining accurate dimensions and measurements for proposing on this project. Any sketches / pictures are intended to show the scope of work only. No attempt has been made by this RFP to identify all the conditions that may affect the installation of the roofing materials such as parapet walls, HVAC & Plumbing penetrations, roof edge conditions or various situations requiring various types of flashings or any other conditions.

It is the sole responsibility of the Roofing Contractor to field verify these conditions and factor these conditions into the cost of work. The Roofing Contractor is responsible to include the cost of modifying equipment and miscellaneous curbs, including HVAC and Electrical disconnection and reinstallation of equipment / items, to meet manufacturer's requirements for a twenty-year warranty. No change order will be allowed for conditions that could have been identified during a site visit.

The following contractors have been approved by the BESD to provide pricing to the roofing contractor for removal / reinstallation of Mechanical and Electrical items, if necessary.

HVAC: Western Mechanical, Inc. / Advanced Heating & Air Conditioning

Electrical: Electric Works. / Geary Electric / PCP Electric / Golden Spike Electric

Other mechanical and electrical contractors may be used upon approval before the proposal deadline by the CM/GC.

Proposal must include all items necessary to furnish and install a complete weather tight roofing system.

It is the responsibility of the roofing contractor to verify access issues at the project site. Any damage to landscaped or paved surfaces as the result of this contract are the responsibility of the roofing contractor and are to be repaired at no expense to the Box Elder School District or the CM/GC.

No attempt has been made to identify all the conditions that may affect the installation of the roofing materials such as parapet walls, HVAC and plumbing penetrations, roof edge conditions or various situations requiring various types of flashings or any other conditions. It is the sole responsibility of the roofing contractor to field verify these conditions and factor these conditions into the cost of work.

The Roofing Contractor is responsible for field verifying existing roof conditions including but not limited to substrate and decking materials. The roofing contractor is responsible for verifying the compatibility of new roofing products with adjacent existing roofing to be left in place and to ensure a weather tight joint between the two in situations where this might occur. **Proposal must include all items necessary to furnish and install a complete weather tight roofing system.**

The Roofing contractor is to remove any existing roofing materials and provide roofing underlayment, appropriate to the conditions at the project site, as required by roofing products manufacturer for a 20-year warranty.

This work will require the contractor to provide a two-year weather tight labor and materials warranty in addition to the manufacturer's warranty. **Please indicate the membrane manufacturer and include product data with your bid.**
