To Whom It May Concern

As the facilities manager for the past twenty six years at the Cache County School District I have had the opportunity to work with DWA Construction on dozens of projects for the School District. These projects have involved the construction of new schools and additions to existing schools as well as renovations to existing facilities.

A partial list of the projects they have completed for the School District includes the South Cache Middle School, White Pine Middle School, Birch Creek Elementary, Heritage Elementary, Lewiston Elementary, North Park Gymnasium Addition, Sky View High School Band Room and Media Center Addition, The Cache Education and Technology Center, Ridgeline High School and Green Canyon High School.

DWA Construction has provide consultation services during the design phase of most of the above mentioned projects including cost analysis and budget control, schedule development and product recommendations. During the bidding and construction phase their expertise in value engineering, work flow management and quality control have been invaluable.

I have no hesitation in recommending them for any project you may have in mind. I hold them in high regard and rank them in the top tier of all the contractors I've worked with.

Please feel free to contact me with any questions you may have.

Sincerely,

Bruce Parker
Facilities Manager
Cache County School District
